Screen atlas and Figma hand-off

Every lane screen, captured from the working app with deterministic demo data.

49	5	196	2
SCREENS	LANES	PNG FRAMES	VIEWPORTS

Desktop is captured at 1440 x 900 and phone at 390 x 844, each as a design canvas and as a full scroll height. Every frame loads `?demo=1`, so the seed and the clock are frozen and the images are identical on every run.

The PDF is a readable archive and print copy. Figma still receives the flat PNG frames through `shots/figma-manifest.csv`; this file does not become editable Figma layers.

CONTENTS

Five lanes, one workflow

Each screen has one page: purpose, both design canvases, frame names and the source page.

Dashboard

Your landing screen. It holds the queue that needs your action, the eight status labels as links, quick actions, due maintenance and the recent history. The office lane does not draw the ticket activity chart; the status breakdown takes the full width instead.
